

The place for agri-tech business incubation

Cranfield University

Join in with experts at Agri-EPI's Crop Technology Hub at Cranfield University and access spaces to Inspire, Innovate and Grow.

If you are a UK agri-tech or agri-food SME, start-up or entrepreneur looking to ensure commercial success, Agri-EPI Centre provides the opportunity to invent, prototype and bring your agri-tech products and services to market.

Rent offices and practical technology business incubator workshop spaces, access precision technology and agricultural equipment as well as real-time commercial farm testbeds.

Agri-EPI Centre is an ecosystem of tech innovators, engineering excellence, business thinkers, and food and farming experts from the livestock, arable, horticulture and aquaculture sectors, driving growth from the UK and supporting farmers and business owners to become more profitable and sustainable.

Get in touch to discuss business incubation opportunities at team@agri-epicentre.com.
