meetings rooms

Office
spaces

A food-specific
laboratory

Access to precision
technology and
agricultural equipment

Academic
collaborators

Larger Scottish
ecosystem of
industry players

“Agri-EPI Centre gave us the opportunity to grow – with space for the team and for the bugs! Being based here and having access to the support and the network has been a huge factor in our growth.”

Thomas Farrugia
CEO and founder at Beta Bugs

Our laboratory features state-of-the-art equipment:

**Voice200 Syft
Mass Spectrometer**
Capable of highly sensitive, selective and non-discriminatory semi/ volatile organic compound analysis of air, water and soil samples.

**TA.XT Plus 100C
Texture Analyser**
Capable of analysing various food, soil and animal feed samples for things such as consistency and shearing resistance.

**NIRFlex N-500 FT-NIR
Spectrometer**
Used to analyse food, beverage and animal feed samples for moisture, macronutrients and protein content.

Contact us at enquiries@agri-epicentre.com for details on using our state-of-the-art laboratory equipment and facilities.
