Transforming agriculture through Innovation

Agri-EPI: The centre for engineering precision innovation in farming helps to develop solutions to empower more sustainable farms. With our expert project management solutions, we bring together industry leaders, researchers, and businesses to drive progress in agriculture and food production.

Agri-EPI Centre is involved in a wide range of projects across the agri-tech sector. Our project management team is committed to supporting you and your team from concept right through to successful delivery.

“Applying for funding and navigating our way through a project seemed extremely daunting for a small company. Agri-EPI guided us through the initial application and have supported us through the project keeping timings and communication all on target.”

Anthony Marsh
Director, Hoofcount

Why Choose Agri-EPI's Project Management Services?

Our experts:

Agri-EPI's Project Managers, comprised of professionals with diverse and extensive backgrounds and members of the APM (chartered body for Project Management), bring a wealth of skills and experience to deliver successful results. Agri-EPI is committed to having all Project Managers trained to industry recognised standards.

From concept to reality:

Agri-EPI'S projects span a broad range of industry-led agricultural technologies in applied research and development. To date, we have been successfully involved with 60 CR&D projects and 140 commercial projects.

Bespoke solutions:

Agri-EPI understands that every project is unique, and we offer project management solutions tailored to your specific requirements.

Technical knowledge:

Agri-EPI stays at the forefront of technological advancements to drive informed decision-making. Not only can we deliver Project Management services, but build upon technical knowledge from engineering, product development, system integration and real farming heritage.

Fostering collaboration:

Agri-EPI's extensive network is made up of farmers, researchers, tech developers, and leaders from across the industry. We offer valuable opportunities for collaboration and knowledge exchange.

The facilities, expertise and network at Agri-EPI Centre are amazing. There's no way a start-up would find a set-up like this commercially. With Agri-EPI Centre support, we are on the way to solving a decades-long sector-wide challenge – developing harvest automation for the specialist food produce market.
